

DSS Panel Discussion and Q&A Session

The screenshot shows the UCI Libraries Digital Scholarship Services (DSS) website. The header features the UCI Libraries logo and navigation links: FIND (Books & Collections), SERVICES (Service Points & Tools), ABOUT (Visiting & Contacts), and HELP (Ask a Librarian & Guides). A search bar is present with the text "Search for books, journals, guides, web pages". Below the header, a banner for "DIGITAL SCHOLARSHIP" with the tagline "Transforming the Practice of Research" is displayed. A blue bar contains links to "Schedule DSS Consultation" and "Email DSS". The main content area is titled "Digital Scholarship Services (DSS)" and includes a paragraph about DSS fostering the use of digital content. It lists three areas of focus: Scholarly Communication, Data Curation, and Digital Production, each with a brief description. A "Spotlight" section features a "dash | UCI" logo and a video thumbnail with the text "An easy-to-use data publication s" and a "Get Started" button. A Twitter feed for #ucilibdss is also visible, showing a tweet from Shu Liu (@shu_shushulu) about linked data annotation. On the right side, a sidebar contains a list of links: DSS Home, What We Do, Who We Are, Projects & Activities, Training & Events, and FAQ. Below these links are two prominent blue buttons: "Schedule DSS Consultation" and "Email DSS".

Data curation is the active management of data to maintain and extend its value over time. It includes effectively organizing data for access, documenting context for reproducibility, and securely preserving the physical integrity of the work. We help you with all stages of data management required by funding agencies:

- Write grant winning [Data Management Plans](#)
- Deposit data into [repositories](#) for access and preservation
- Capture metadata to allow re-use
- Create permanently [resolvable hyperlinks](#)
- Connect your data with your publications

Create or support creation of themed digital collections that are openly accessible for scholarly use, including text, image, audio, video, or other media types. We can help you:

- Appraise and digitize content in traditional media for discovery and online access
- Design metadata solutions suiting the nature of content and the purpose of project
- Manage digital assets and make them accessible online in user-friendly ways

Digital preservation is the active management of digital content over time. It combines policies, strategies, and actions to ensure ongoing access to and accurate rendering of authentic reformatted and born-digital content. We can help you:

- Migrate content in obsolete or fragile formats to sustainable formats
- Store content in trusted repositories for long-term access
- Use reliable tools to harvest, build, and preserve collections of web content
