CRITERIA FOR PERSONNEL ACTIONS
FOR THE LIBRARIAN SERIES

Criterion I: Professional Competence and Quality of Service within the Library

Although contribution in each of the following areas will vary considerably from person to person depending on each person’s primary functions as a librarian, performance and potential shall be reviewed and evaluated in any or all areas of librarianship.

Additionally, librarians should be evaluated on consistency of performance, grasp of library methods, command of their subjects, continued growth in their fields, judgment, leadership, originality, ability to work effectively with others, and ability to relate their functions to the more general goals of the library and the University.

Evidence of effective service may include, but is not limited to, the opinions of faculty members, students, or other members of the University community as to the quality of a collection developed, for example, or the technical or public service provided by the candidate; the opinions of professional colleagues, particularly those who work closely or continuously with the appointee; the opinions of librarians outside the University who function in the same specialty as the candidate; the effectiveness of the techniques applied or procedures developed by the candidate; and relevant additional educational achievement, including programs of advanced study or courses taken toward improvement of language or subject knowledge.

Criterion II: Professional Activity Outside the Library

A candidate’s professional commitment and professional contributions to the library profession should be evaluated by taking account of such activities as the following: membership and activity in professional and scholarly organizations; participation in library and other professional meetings and conferences; consulting or similar service; outstanding achievement or promise as evidenced by awards, fellowships, grants; teaching and lecturing; or editorial activity.

Criterion III: University and Public Service

Evaluation of a candidate’s University and Public Service should take into account University-oriented activities including but not limited to the following: membership or chairmanship of administrative committees appointed by the Chancellor, University Librarian, or other university administrative officers; and memberships or chairmanship of other University committees, including those of student organizations and of departments and schools other than the Library such as service on thesis or dissertation portfolio committees. Public service includes professional librarian services to the community, state, and nation.

Criterion IV: Research or Other Creative Activity

Research by practicing librarians has a growing importance as library, bibliographic, and information management activities become more demanding and complex. Librarian engagement in academic research enhances their ability to relate their functions to the more general goals of the university. It is therefore appropriate to take research into account in measuring a librarian’s professional development. The evaluation of such research or other creative activity should be qualitative and not merely quantitative and should be made in comparison with the activity and quality appropriate to the candidate’s areas of expertise. Note should be taken of continued and effective endeavor. This may include authoring, editing, reviewing or compiling books, articles, reports, handbooks, manuals, and/or similar products which are submitted or published during the period under review.”
