Names are not enough to ensure credit for your work.
We want researchers to spend more time making contributions and less time managing them.

Benefits of using ORCID

- **Eliminate name ambiguities:**
  - By registering and using an ORCID ID you can easily distinguish yourself and assure that your work is attributed only to yourself.

- **Save time:**
  - An ORCID ID can reduce repetitive data entry. As ORCID is becoming increasingly implemented into other systems, the reuse of profile or publication data is being facilitated more easily.

- **Create a comprehensive list of research outputs and activities:**
  - You can add all of your publications, works and activities to your ORCID profile to create a comprehensive listing in one place, including outputs like datasets, grants, peer review activities and more.

- **Improve discoverability:**
  - You uniquely associate your identity to various research outputs, making them more discoverable wherever you use your ORCID.
3 Easy Steps

1. REGISTER
   Get your unique ORCID identifier Register now!
   Registration takes 30 seconds.

2. ADD YOUR INFO
   Enhance your ORCID record with your professional information and link to your other identifiers (such as Scopus or ResearcherID or LinkedIn).

3. USE YOUR ORCID ID
   Include your ORCID identifier on your Webpage, when you submit publications, apply for grants, and in any research workflow to ensure you get credit for your work.
ORCID Examples

Who We Are

I can help you

- Manage deposit of your publications into open access repositories
- Grow your scholarly reputation via identity management techniques
- Track usage of your publications and data via impact metrics
- Understand better copyright and fair use as an author or a scholar

ORCID 0000-0002-3366-1281
Scholarly Communication Coordinator / Research Librarian for Chemistry, Earth System Science, Pharmaceutical Sciences and Russian Studies

I can help you

- Write effective Data Management Plans (DMPs) to satisfy funding agency requirements and to potentially enhance the competitiveness of your grant proposals
- Use data management best practices to increase reproducibility of your data
- Develop metadata to describe your data
- Deposit your data into open access repositories, ensuring your data is discoverable and citable
