The UCI Libraries Exhibits Program promotes the diverse holdings and scholarly and cultural value of the Libraries' collections to the campus and community. To learn more about this and other library programs, please visit our website at <http://partners.lib.uci.edu> or call 949-824-4651.

UCI Libraries

WATER in **CALIFORNIA**

Issues, Impacts & Innovation

On display beginning
Wednesday, February 21, 2018
Science Library, 2nd Floor *Bar Alcove*
University of California, Irvine

Welcome to the UCI Libraries' 2018 Winter Exhibit

Water in California: Issues, Impacts & Innovation

Water in California represents a confluence between interdisciplinary research at UCI, library collections, community outreach and artistic expression. This exhibit was co-curated by Julia Gelfand, Applied Sciences and Engineering Librarian for the UCI Libraries and Dr. Shannon Roback, Assistant Director, Water UCI, which is part of the School of Social Ecology.

The exhibit tells several stories about water through examples of local research and scholarship at UCI where faculty and students are committed to studying the issues, impact and potential for innovation. Themes covered in this exhibit include Water Management in California, Innovations in Water Technologies, Public Health and Water, Oceanography and Coastal Issues, Water as a Global Concern, and Water and Creativity.

The exhibit opening held on February 21, 2018 featured:

- David Feldman Ph.D., Professor of Urban Planning and Public Policy (School of Social Ecology) and Political Science (School of Social Sciences) and Director, Water UCI
- Stanley Grant Ph.D., Professor Civil and Environmental Engineering and Chemical Engineering and Materials Science (Samueli School of Engineering)
- Performers from the Claire Trevor School of Arts Department of Dance under the direction of Lisa Naugle Ph.D., Professor and Department Chair of Dance

In addition to the formal exhibit, artwork by students from Lakeside Middle School, part of the Irvine Unified School District, is on display within the space. Dr. Roback has been working with both STEM and art teachers at Lakeside as part of the Water UCI program. A medley of short videos produced for public education, created by the Orange County Water District on different themes is also available for visitors to view.

I hope you enjoy the exhibit and will invite others to come view it!

Lorelei Tanji
University Librarian

David Feldman Ph.D.

Stanley Grant Ph.D.

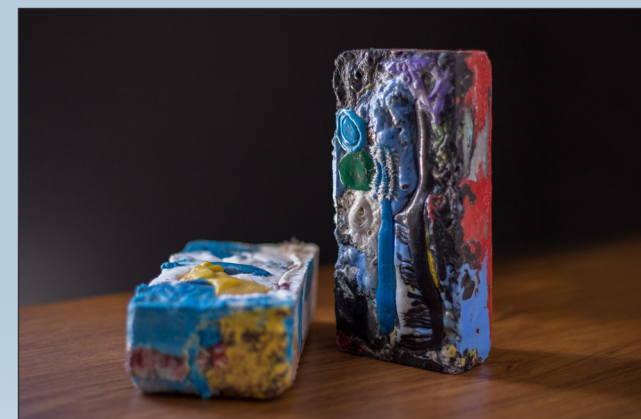

"Building Collections of Excellence" is one of the Libraries' highest priorities.

Ground-breaking faculty research and high-quality student instruction are made possible with first-rate library collections of print and electronic materials.

Support for the acquisition, preservation, and accessibility of materials helps to ensure that we are able to continue to enhance the value of a student's educational experience and lead researchers to new discoveries.
